

# About the R11CC

The Region 11 Comprehensive Center (R11CC) is one of 19 regional centers across the nation that helps state education agencies implement, scale, and sustain evidence-based programs, practices, and interventions that support improved educator and student outcomes.

## *Tailored Learning Acceleration Approaches in the Region 11 Comprehensive Center Network*

**Need:** Groups of students in Region 11 have experienced disproportionate impacts to academic and behavioral outcomes because of the pandemic. In all local education agencies (LEAs), at least some students missed in-person instruction and experienced disengagement. These students often were members of groups who have been historically marginalized (for example, students of color, students with disabilities, English learners, students living in poverty).

**How we're helping:** The R11CC will work with the state education agencies (SEAs) and LEAs across the four-state region—Nebraska, North Dakota, South Dakota, and Wyoming—to build capacity for a shared definition and lexicon surrounding approaches for tailored acceleration. The team will study the practices being implemented to create a resource that can be used by all LEAs, highlighting successful implementation of accelerated learning approaches.

We're helping to:

- Build capacity across the region for a shared definition and lexicon surrounding approaches for tailored and accelerated learning.
- Survey LEAs and building administrators on their accelerated learning implementation efforts.
- Identify and share trends, best practices, and cost-effective strategies used in the region.

**What we plan to accomplish:** The R11CC will disseminate findings to various stakeholders through a multimodal approach. In the long term, these evidence-based accelerated learning and tailored learning practices are intended to improve achievement scores and social-emotional outcomes for those who were disproportionately impacted. Across the four states, there is the potential for the work to benefit 607 LEAs serving more than 649,000 students.
